Forum Hungaricum's aggregation service

Etele Szüts

head of Digital Archive Development Department, Forum Hungaricum Non-profit Ltd, Budapest

The Forum Hungaricum Non-profit Ltd. has a significant eight-year experience in digitising cultural contents, due to its professional predecessor the Hungarian National Digital Archive and Film Institute. The goal of the aggregation database, being developed by the Company continuously, – http://en.mandadb.hu – is the digitisation of the intellectual and cultural heritage related to Hungary and to make them accessible to the great public on a central public online surface within the frames of effective copyright law.

By publishing digital contents, the Company contributes to making cultural goods guarded in public collections accessible to the Hungarian society, Hungarian communities living outside Hungary, and to international interested people. The high-priority task of the Company is the content provision to the digital library of the European Union Europeana. Forum Hungaricum is the largest data provider in Hungary.
